

FANUC A02B-0200-C081 Manual

Brand	FANUC
Product Series	FANUC
Product Type	Operator Interface Panel

Description

The FANUC A02B-0200-C081 is a dedicated operator interface panel designed for enhanced user interaction. It features a 7.2-inch mono LCD display and utilizes soft key inputs for navigation and control.

Technical specifications for A02B-0200-C081

Manufacturer FANUC

Product Type Operator Interface Panel

Product Line A02B

Part Number A02B-0200-C081

Display 7.2-inch Mono LCD

Operating Temperature 0°C to 50°C

Key Type 7 Soft Keys

Input Voltage 24V DC

Storage Temperature -20°C to 60°C

Panel Type Separate Type

Interface Type RS-232 / RS-422 / RS-485

Mounting Type Panel Mount

Backlight Type LED Backlight

Description

The A02B-0200-C081 model from FANUC is an operator interface panel that focuses on effective user engagement and control. Featuring a clear 7.2-inch mono LCD display, users can easily interact with the system. This device operates on a 24V DC input, making it suitable for common industrial applications. It is lightweight, weighing 1.81 kilograms, which allows for straightforward installation.

Its design allows for use in operational temperatures ranging from 0°C to 50°C. It also accommodates storage in environments between -20°C and 60°C, emphasizing versatility in various settings. The panel is categorized as a separate type and is intended for panel mounting, making it suitable for integration into different systems.

For user interaction, the unit includes 7 soft keys that facilitate intuitive control over various functions. Visibility is enhanced through an LED backlight, ensuring that the display remains clear even in low-light environments. The interface capabilities of the A02B-0200-C081 include support for RS-232, RS-422, and RS-485 communication standards, providing flexibility for connection with many devices.
