

Mitsubishi GT2708-STBD Manual

Brand	Mitsubishi
Product Series	Mitsubishi Pepperl+Fuchs Omron
Product Type	Advanced Graphic Operation Terminal (GOT)

Description

The GT2708-STBD is an advanced graphic operation terminal by Mitsubishi, designed for use in the GOT2000 series. It features an 8.4-inch TFT color LCD with a resolution of 800 x 600 pixels and a color depth of 65,536 colors.

Technical specifications for GT2708-STBD

Manufacturer Mitsubishi

Product Line GOT2000

Part Number GT2708-STBD

Weight 6.81 lbs (3.09 kg)

Device Type Advanced Graphic Operation Terminal (GOT)

Series Compatibility GOT2000 Series

Applicable Models GT27

Display Size 8.4 inches

Display Type TFT color LCD

Display Resolution 800 x 600 pixels (SVGA)

Display Colors 65,536 colors

Backlight Type LED

Touch Panel Type Analog resistive film digitizer

Panel Color Black

Memory Capacity 57 MB (ROM), 128 MB (RAM)

Description

The Mitsubishi GT2708-STBD represents a highly capable graphic operation terminal within the GOT2000 lineup. Featuring an 8.4-inch TFT color LCD, this terminal delivers a resolution of 800 x 600 pixels, ensuring sharp image quality and clarity. The display supports up to 65,536 colors, allowing for vibrant graphics that enhance user experience.

This advanced device incorporates an analog resistive film digitizer for responsive touch interactions, making navigation and input straightforward. The device's LED backlight provides enhanced visibility, ensuring that information remains clear in various lighting conditions.

Designed specifically for the GT27 models, the GT2708-STBD terminal is part of the broader GOT2000 series, demonstrating versatility in application. It is supported by a robust memory capacity, including 57 MB of ROM and 128 MB of RAM. The black panel color adds a professional finish to the terminal's overall appearance, making it suitable for industrial environments.
