

Mitsubishi FX3SA-20MT-CM Manual

Brand	Mitsubishi
Product Series	Mitsubishi Pepperl+Fuchs Omron
Product Type	Transistor Type

Description

Manufacturer : Mitsubishi Electric

FX3SA-20MT-CM

Input and output points: 20 points

Power supply: AC100-240V

Input points: 12 points

Output points: 8 points

Output : Relay Type Transistor Type

Output form: transistor output (drain)

Power consumption: 20W

Internal memory 16,000 steps EEPROM (program capacity is limited to 4,000 steps.)

Communication port : USB/RS-422

High-speed counter : 1-phase / 60 kHz : 2 points / 10 kHz : 4 points

Positioning control (transistor output type) 2 axes 100 kHz
