

FANUC A02B-0281-C071 Manual

Brand	FANUC
Product Series	FANUC
Product Type	Display Monitor

Description

The FANUC A02B-0281-C071 is a 10.4-inch LCD display monitor designed for industrial use. With a resolution of 800 x 600 pixels, it features a color display supported by graphic capabilities and soft key options, offering clear visual representation during operation.

Technical specifications for A02B-0281-C071

Manufacturer FANUC

Product Type Display Monitor

Product Line A02B

Part Number A02B-0281-C071

Weight 6.25 lbs (2.83 kg)

Display Size 10.4" LCD

Input Voltage 100-240 VAC

Display Type Color LCD with Graphic & Soft Keys

Mounting Type Panel Mount

Resolution 800 x 600 pixels

Brightness 300 cd/m²

Response Time 8 ms

Operating Temperature 0°C to 55°C

Description

The A02B-0281-C071 from FANUC is a feature-rich display monitor that accommodates various industrial applications. With a generous 10.4-inch LCD screen, the unit delivers impressive clarity and detail, thanks to its 800 x 600 pixel resolution. This makes it suitable for visually demanding tasks requiring significant accuracy and precision. The color LCD incorporates graphic support, enhancing the user experience by presenting information in an easily digestible format.

Operating on an input voltage between 100 and 240 VAC, the monitor is flexible enough to work in different electrical environments. The display is built for panel mounting, allowing for streamlined installation within various configurations. Weighing in at 2.83 kilograms, it is lightweight, facilitating a straightforward setup without compromising structural integrity.

In terms of visual performance, the display achieves a brightness of 300 cd/m² and boasts a rapid response time of 8 milliseconds, which is essential for dynamic applications requiring real-time information display. It is designed to operate within a temperature range of 0°C to 55°C, maintaining functionality in a variety of conditions. Overall, this monitor is engineered to deliver reliable performance, adaptability, and precise data representation in demanding industrial settings.
