

Allen-Bradley 2711P-B10C4D2 Manual

Brand	Allen-Bradley
Product Series	2711P
Product Type	Keypad/Touchscreen

Description

The 2711P-B10C4D2 terminal is a touchscreen/keypad terminal from the Allen-Bradley Panelview Plus 1000 terminal series. It comes with both a touchscreen and a keypad for data input and system control. The 2711P-B10C4D2 terminals' most common application functions can be saved to specific programmable function keys on the terminal's keypad. The touchscreen on the terminal is also its display screen, and it is 10 inches wide with

Technical specifications for 2711P-B10C4D2

Manufacturer Rockwell Automation

Brand Allen-Bradley

Part Number/Catalog No. 2711P-B10C4D2

Product Line Panelview Plus 1000

Display Size 10.4 in.

Display Color Color

Input Type Keypad/Touchscreen

Communication Ethernet and RS-232

Input Power 18-32 VDC

Memory 128 MB

Backlight 2711P-RL10C

Communication Cable 1761-NET-ENI

Shipping Weight 10 lbs.

Shipping Dimensions 18 x 14 x 8 in

Series Ser A, B, C, D, and F

UPC 10662073071362

Product Lifecycle Status* Discontinued/Obsolete Description

The obsolete Allen Bradley Panelview Plus 1000 2711P-B10C4D2 is an operator terminal that allows the user to interface with their machine. This HMI has a 10.4 in. Color Display screen. The user is able to control the operator terminal using the Keypad/Touchscreen to input information and data. This unit is powered using 18-32 VDC power. This Panelview Plus has the following internal memory: 128 MB. This unit has an internal backlight replacement part number of 2711P-RL10C. The approximate shipping weight and dimensions are 10 lbs. and 18 x 14 x 8 in. The most common Series are: Ser A, B, C, D, and F. EtherNet/IP (Ethernet Industrial Protocol) is an open industrial network that supports real time I/O messaging, as well as message exchange. The Ethernet port connects to a controller on an EtherNet/IP network by using both the network and standard Ethernet connections. This port can work with application transfers and printing as well. The EtherNet/IP screen displays and allows the user to modify some of the EtherNet/IP communication settings for a PanelView terminal. If another port is required, the 2711P-RN20 Ethernet communication module is available for the 700 to 1500 Panelview Plus terminals. Each module has a specific and unique IP address. This port has an RJ45, 10/100Base-T connector for network communication and enables MDI/MDI-X connections. The parameters can be downloaded with the application.
