

Allen-Bradley 2711P-B10C4D9 Manual

Brand	Allen-Bradley
Product Series	2711P
Product Type	Keypad/Touchscreen

Description

The 2711P-B10C4D9 terminal is both a control terminal and a display terminal. It has been designed and manufactured by Allen-Bradley/Rockwell Automation as part of the Panelview Plus 6 series. The 2711P-B10C4D9 control and display terminal supports 2 different control and input methods which are a touchscreen and a keypad. The touchscreen features color graphics and it is 10 inches wide. The keypad on the 2711P-B10C4D9 control

Technical specifications for 2711P-B10C4D9

Manufacturer Rockwell Automation

Brand Allen-Bradley

Part Number/Catalog No. 2711P-B10C4D9

Product Line Panelview 6 Plus

Display Size 10.4 in.

Display Color Color

Input Type Keypad/Touchscreen

Communication Ethernet and RS-232

Input Power 18-32 VDC

Memory 512 MB RAM

Backlight 2711P-RL10C2

Communication Cable 2711-NC14

Shipping Weight 8 lbs.

Shipping Dimensions 16 x 14 x 8 in

Series Series A and Series B

Description

The current Allen Bradley Panelview 6 Plus 2711P-B10C4D9 is an HMI that allows the user to interact with their machine. This operator interface has a 10.4 in. Color Display. The user is able to control the operator interface by utilizing the Keypad/Touchscreen to input information and data. This unit is powered using 18-32 VDC power. This unit has the following internal memory: 512 MB RAM. If applicable this unit has an internal backlight replacement part number of 2711P-RL10C2. The approximate shipping weight and dimensions are 8 lbs. and 16 x 14 x 8 in. EtherNet/IP (Ethernet Industrial Protocol) is an open industrial network that supports real time I/O messaging, as well as message exchange. The Ethernet port connects to a controller on an EtherNet/IP network by using both the network and standard Ethernet connections. This port can work with application transfers and printing as well. The EtherNet/IP screen displays and allows the user to modify some of the EtherNet/IP communication settings for a PanelView terminal. The 2711P-RN20 Ethernet communication module is available for the 700 to 1500 terminals if another Ethernet port is required. The module has its own unique IP address. This port has an RJ45, 10/100Base-T connector for network communication and supports MDI/MDI-X connections. The parameters are downloaded with the application.
